HAMSTER ZORBING OPERATING INSTRUCTIONS

The Zorbs are classified as Hamster Zorbs, they have no harness and should only be used for the intention stated.

1. The operator must ensure all participants are aware of the risks associated with the activity
    a. *Claustrophobia*
    b. Falling whilst inside the zorb
    c. Loss of balance & Dizzyness
    d. Body parts coming out entry/exit hole
2. All belts must be removed prior to entry
3. All shoes must be removed prior to entry
4. All jewellery must be removed prior to entry
5. Zorbs must only be used on a flat surface (zero incline)
6. Only 1 participant should be inside the zorb at any time
7. The zorb should be completely stationary when entering and exiting, Other participants should use the handles provided to keep the zorb stationary
8. For indoor use ensure there are no sharp objects (table corners etc) as this will puncture the zorb
9. The zorb should only be inflated using the hoover provided.
10. Ensure appropriate spotters are in place to avoided roll off or potential puncture
11. If wet ensure zorb is fully inflated to dry after use
